EXPERIMENT 4

ROLL NO: 240701470 NAME: SANKARA GOMATHI R

Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups using proto.io

Screen 1:Splash / Welcome Screen – Water Reminder(HydroTrack)

✓ Familiar Icons / Elements

1. **Get Started Button**
   - A common call-to-action button used in most mobile applications.
   - Helps users proceed to the next screen easily.
   - Very familiar to users of all age groups.
2. **App Name (HydroTrack)**
   - Displaying the app name prominently is a familiar design pattern.
   - Helps users immediately understand the purpose of the application.

Screen 2: LOGIN PAGE:

Familiar Icons / Elements:

1. **Username Input Field**
   - A commonly used text field for user identification.
   - Found in almost all sign-in pages of mobile applications.
   - Allows users to enter their login credentials easily.
2. **Password Input Field**
   - A standard security-related input field.
   - Widely recognized and familiar to all users.
   - Used to protect user information during authentication.
3. **Login Button**
   - A common call-to-action button used to submit login details.
   - Clicking this button allows the user to proceed to the next screen.
   - Very familiar navigation element.
4. **LOGIN Heading**
   - Clearly indicates the purpose of the screen.
   - Commonly used title in authentication screens.

Possibly Unfamiliar Icons / Elements:

1. **Water Drop Icon (Above Login Title)**
   - Symbolic icon representing hydration.
   - Not a standard icon used in login or authentication screens.
   - Some users may interpret it as decorative or branding rather than a functional element.
2. **Theme-Based Background Color (Light Blue)**
   - Login screens usually use neutral or white backgrounds.
   - The use of a hydration-themed color may be unfamiliar to first-time users.
   - Serves as a visual cue related to the app's purpose rather than navigation.

SCREEN 3:

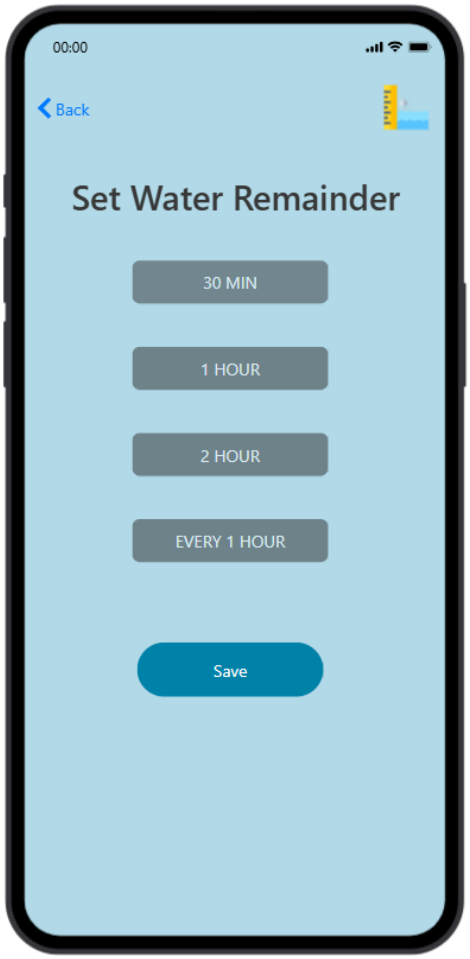
Familiar Icons / Elements:

1. **Back Arrow (←) – Top Left Corner**
   - A widely recognized navigation icon.
   - Used to return to the previous screen.
   - Commonly found in most mobile applications.
2. **Save Button**
   - A standard call-to-action button.
   - Used to store or confirm user-selected settings.
   - Very familiar to users across different apps.
3. **Time-Based Options (30 MIN, 1 HOUR, 2 HOUR)**
   - Similar to alarm and reminder applications.

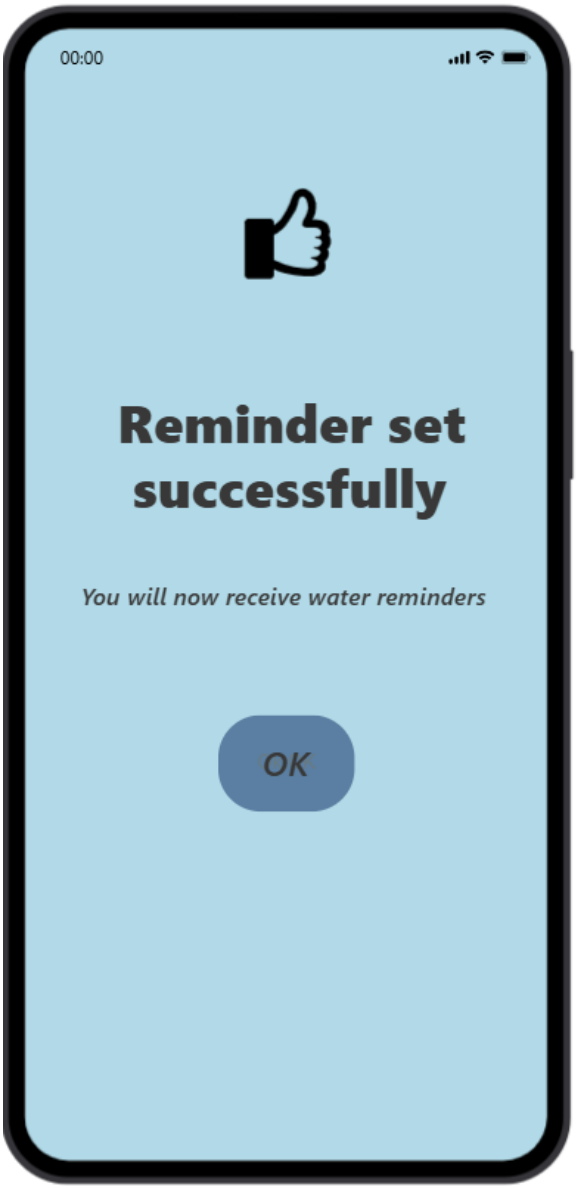
- Users are familiar with selecting time intervals for notifications.

Possibly Unfamiliar Icons / Elements:

1. **Fixed Interval Buttons Displayed as Blocks**
    - Reminder intervals are shown as multiple buttons instead of a dropdown or time picker.
    - Some users may expect a slider or clock-based selector.
    - This layout may feel unfamiliar initially.
2. **"EVERY 1 HOUR" Option**
    - Represents a repeating reminder rather than a one-time interval.
    - The wording may require brief understanding for first-time users.
    - Slightly abstract compared to selecting an exact time.
3. **Hydration Level / Scale Icon (Top Right Corner)**
    - Symbolic representation related to water intake.
    - Not a standard icon used in reminder-setting screens.
    - May be interpreted differently by users (measurement, progress, or water level).



SCREEN 4:



Confirmation Page

Familiar Icons / Elements:

1. **Confirmation Message ("Reminder set successfully")**
    - A commonly used feedback message after completing an action.
    - Reassures the user that the reminder has been saved.
    - Very familiar across utility and settings-based applications.
2. **OK Button**
    - A standard acknowledgement button.

    - Used to close the message or proceed to the next screen.
    - Familiar to users of all age groups.
3. **Confirmation Flow**
    - Showing a success screen after saving settings is a familiar interaction pattern.
    - Helps users understand that their action was completed successfully.

Possibly Unfamiliar Icons / Elements:

1. **Thumbs-Up Icon (👍)**
    - Commonly associated with likes or feedback in social media applications.
    - Not a standard system icon for confirmation in reminder or utility apps.
    - Some users may initially associate it with approval rather than task completion.
2. **Minimal Interaction Design**
    - The screen provides only an OK button with no additional actions.
    - Users who expect options like “Edit” or “View Reminder” may find this unfamiliar.

SCREEN 5:

Today’s Water Status Page

Familiar Icons / Elements:

1. **Time-Based Status List (9:00 AM, 10:00 AM, etc.)**
    - A commonly used format in activity logs, schedules, and history screens.
    - Helps users easily track actions based on time.
    - Very familiar across productivity and health applications.
2. **Tick (✓) and Cross (✗) Symbols**
    - Widely recognized symbols representing completion and missed actions.
    - Used in checklists, task managers, and status indicators.
    - Easy to understand without additional explanation.
3. **Status Text (“Drank” / “Missed”)**
    - Clear textual feedback accompanying symbols.
    - Makes the status immediately understandable for all users.

Possibly Unfamiliar Icons / Elements:

1. **Hydration Cycle Icon (Circular Arrows with Water Drop)**
    - Symbolic representation of repeated hydration or water intake cycle.
    - Circular arrows are often associated with refresh or sync actions.
    - In a status summary screen, this meaning may not be immediately obvious to all users.
2. **Card-Style Grouped Summary**
    - All time entries are grouped inside a single card.
    - Some users may expect individual rows, charts, or progress bars instead.

    - This layout may feel unfamiliar initially.
3. **Read-Only Status Screen**
    - The screen displays information without allowing direct interaction (e.g., edit or mark as drank).
    - Users accustomed to interactive health apps may find this unfamiliar.
