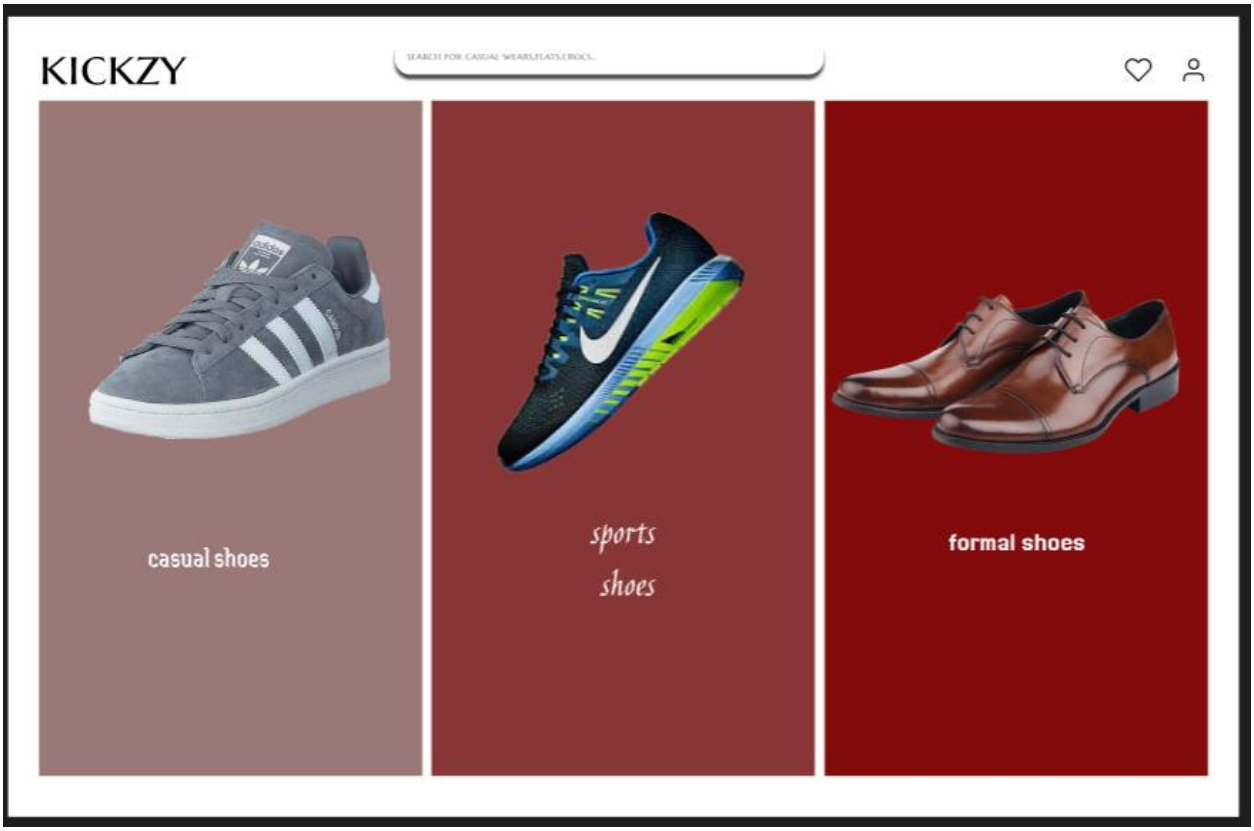
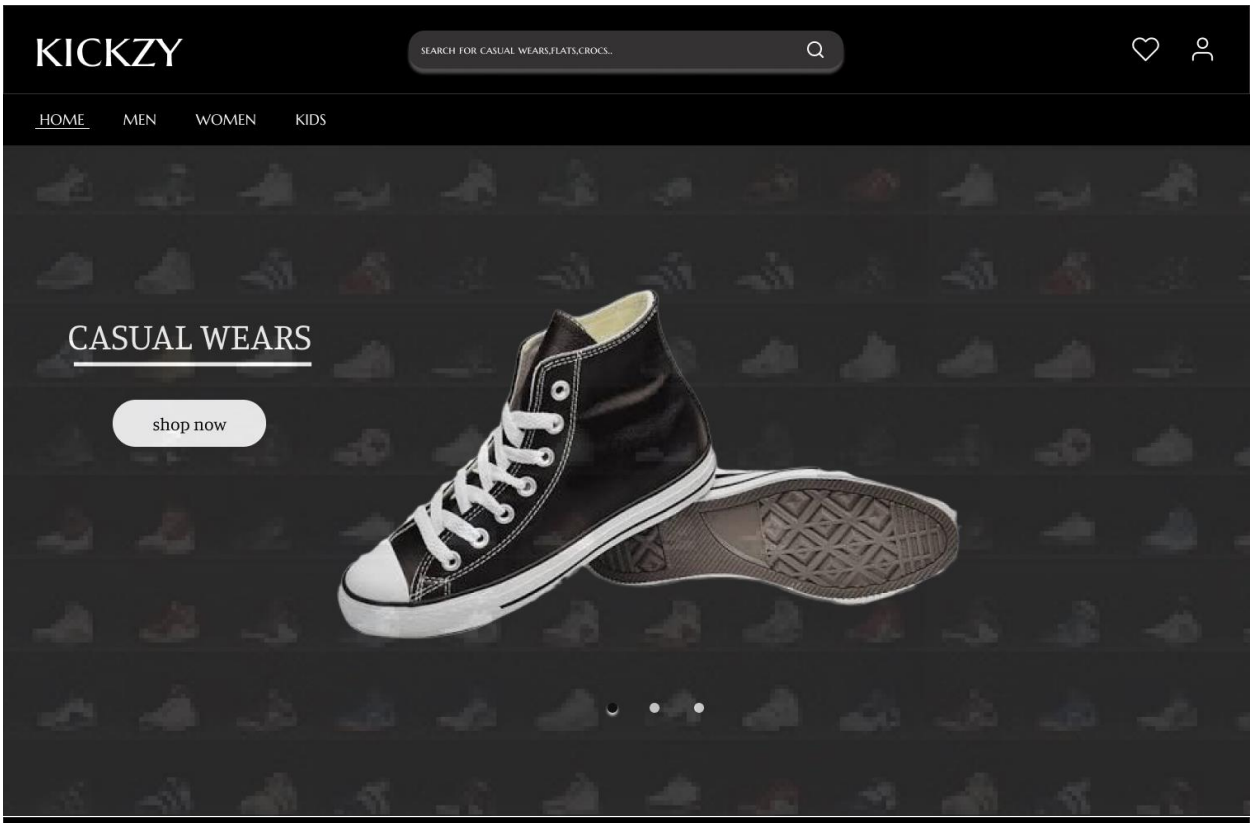
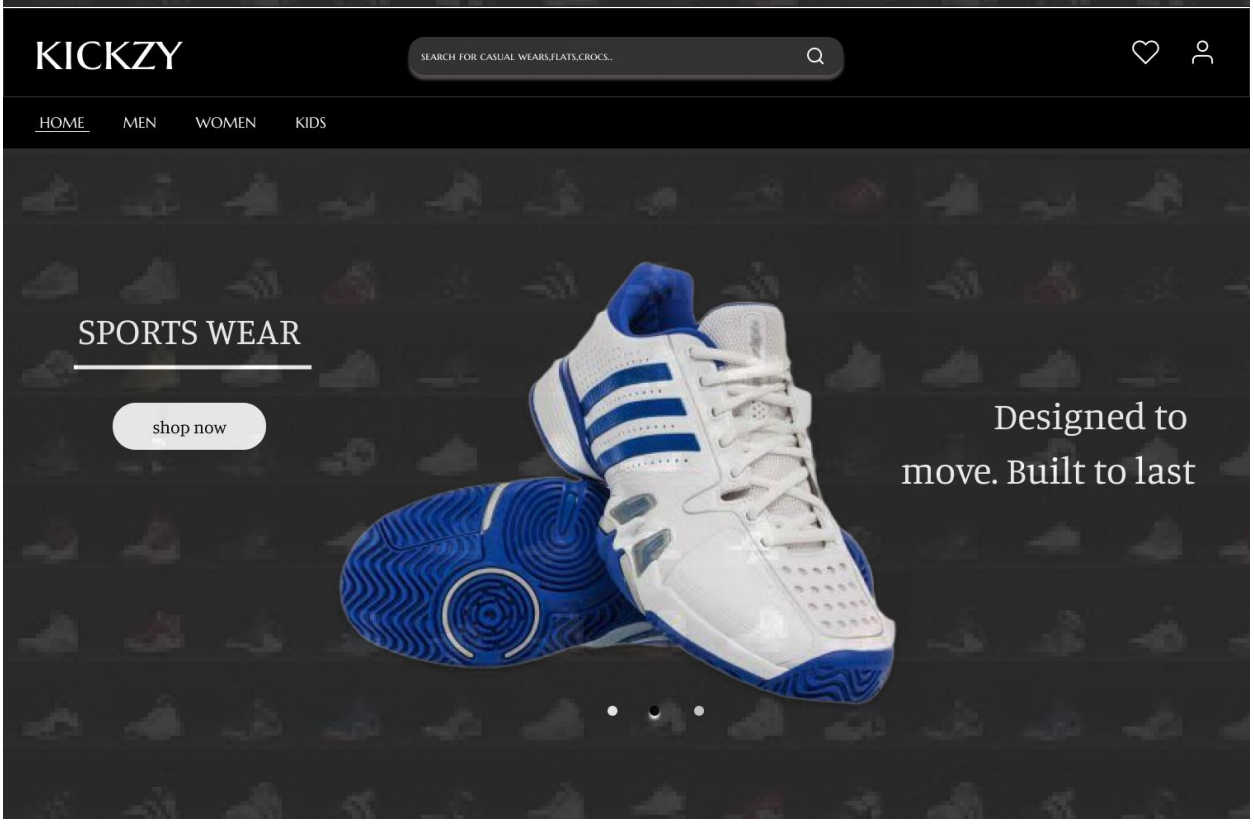
USER INTERFACE AND DESIGN

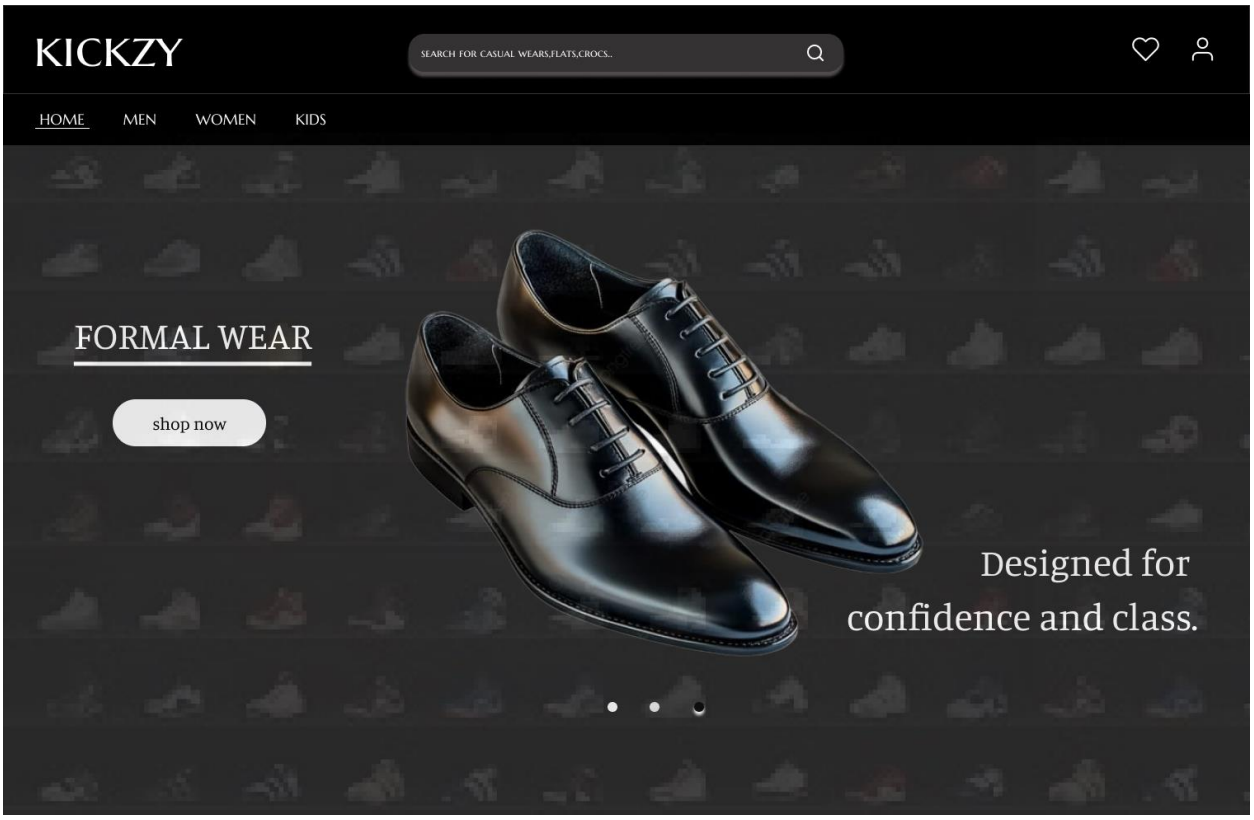
BAD WEBSITE:



GOOD WEBSITE:







PROTOTYPE LINK :

https://www.figma.com/proto/0OyMfI3I1XApnXhi9P3bTD/Untitled?node-id=0-1&t=xCBW2cdIJKSgqZMW-1

The two websites have distinct designs and approaches. Here's a comparison:

BAD WEBSITE (KICKZY):

1.Design Style:

- The layout is **static** and lacks visual engagement.
- **Different font styles are used for headings and labels**, creating inconsistenc
- **Font colors do not match the background properly**, reducing readability.

2.Content:

- Displays only three shoe categories: Casual, Sports, and Formal.
- Content is **too minimal and lacks supporting text**.
- Inconsistent fonts and color usage make the content look unorganized.

3.Navigation:

- Navigation is minimal and basic.
- Icons are present, but they do not add much value to user interaction.

4. Interaction / Motion:

- The page is completely **static**.
- No animations, transitions, or automatic movement.

5. Purpose:

- Focuses only on basic product display.
- Does not effectively represent a strong brand identity.

GOOD WEBSITE(KICKZY):

1.Design Style:

- Uses a **consistent font family** across headings, buttons, and text.
- Font sizes follow a **clear visual hierarchy**, improving readability.
- Color palette is **well-matched and balanced** with the dark background.
- High-quality product images create a **premium and professional look**.
- **Overall layout is clean, modern, and visually appealing**

2.Content:

- Each shoe category includes **clear and meaningful text**.
- Fonts and colors are used consistently, giving a **well-organized appearance**.
- Unnecessary content is removed, keeping the design **simple and focused**.

3.Navigation:

- Navigation bar is clean and well-structured.
- Text and icons follow the same font and color style.
- Helps users move easily between sections.

4. Interaction / Animation:

- The website uses **automatic sliding transitions with delay**.
- Shoe categories move smoothly from:
  - Casual Wear → Sports Wear → Formal Wear
- Smooth motion improves user engagement and visual flow.

5. Purpose:

- Enhances both **user experience and brand identity**.
- Creates a strong impression of a **professional e-commerce footwear website**.

Key Differences:

- **Fonts**:
  The bad design uses different fonts with no consistency, while the good design maintains a single, consistent font style throughout.
- **Colors**:
  In the bad design, text and background colors do not match properly.
  In the good design, colors are well-coordinated and improve readability.
- **Layout**:
  The bad design feels unorganized and static.
  The good design has a clean, structured, and balanced layout.
- **Interaction**:
  The bad design has no motion or animation.
  The good design uses automatic sliding transitions with smooth delays.
- **User Experience**:
  The bad design offers a basic viewing experience.
  The good design provides an engaging and premium user experience.
- **Brand Impression**:
  The bad design looks simple and unrefined.
  The good design represents a professional e-commerce brand.
