EXPERIMENT – 9

Name:Sankara Gomathi R Roll No:240701470

To design input forms that validate data and display error messages using HTML/CSS,JAVASCRIPT

HTML Form

Code:

```
<!DOCTYPE html>
<html>
<body>
<h2>Registration Form</h2>
<form>
Email: <input type="text"><br><br>
Phone: <input type="text"><br><br>
<button>Submit</button>
</form>
</body>
</html>
```

Explanation:

This HTML creates a basic form with email and phone input fields and a submit button.

Output Screen:

Contact us

First Name:

Email Address:

Message:

Send

CSS Styling

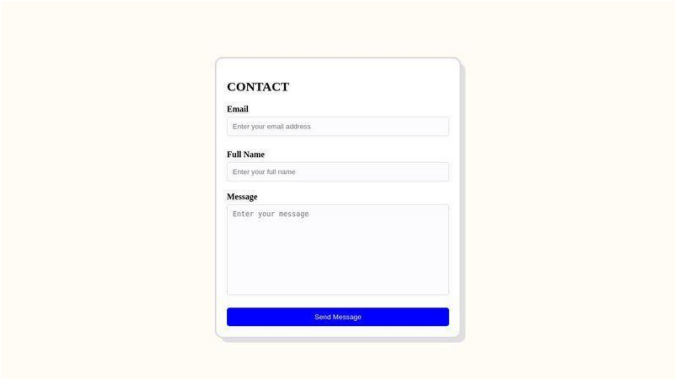
Code:

```
<style>
form {
  background: white;
  padding: 20px;
  width: 300px;
  margin: auto;
}
</style>
```

Explanation:

CSS is used to improve the appearance by adding spacing and alignment.

Output Screen:



JavaScript Validation

Code:

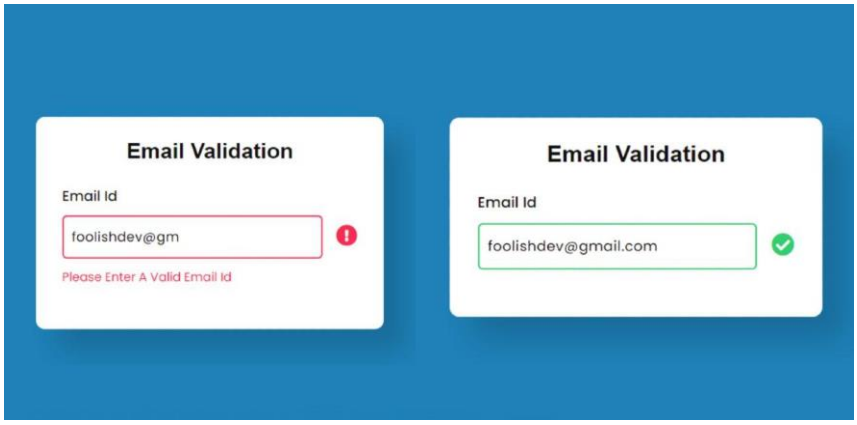
```
<script>
function validate() {
  alert("Validation happens here");
}
</script>
```

Explanation:

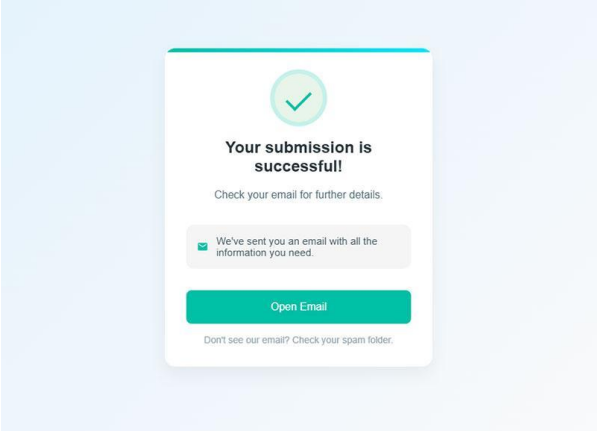
JavaScript checks whether the input values are valid and shows messages.

Output Screen:

Error case:



Error success:



Result

The form validation was implemented successfully.
