EXPERIMENT – 7

ROLL NO: 240701470 NAME: SANKARA GOMATHI R

To design an application layout using different colors, text styles, and visual elements and share them with users to get feedback. Change the design based on the feedback given from the users.

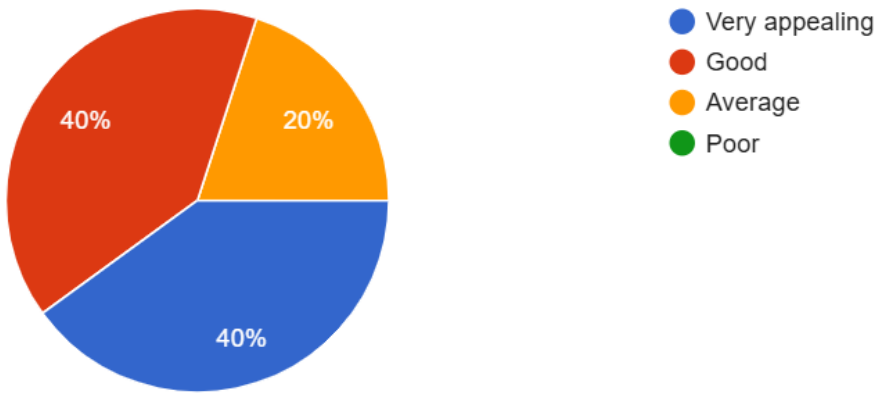
Description:

An initial version of the ON-MART grocery application was created and shared with users through a feedback form. Based on the feedback collected, the design was analyzed and improved to enhance usability, visual clarity, and overall user experience.

Google Form Response:

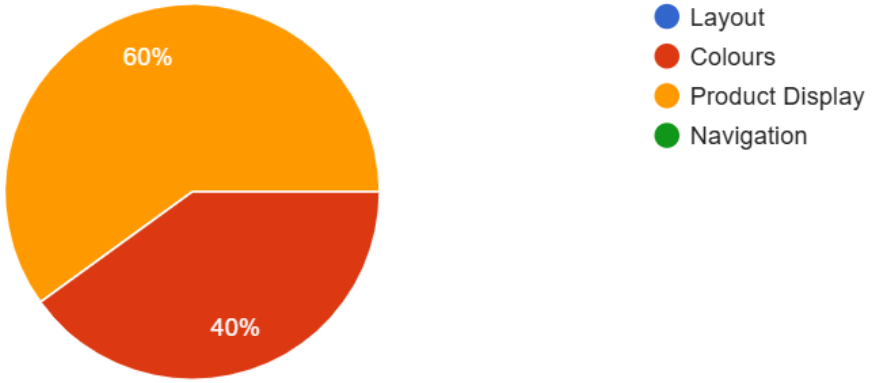
How would you rate your first impression of the OnMart app design ?

5 responses



What caught your attention first?

5 responses



How do you rate the color combination used in the app?

INITIAL DESIGN:

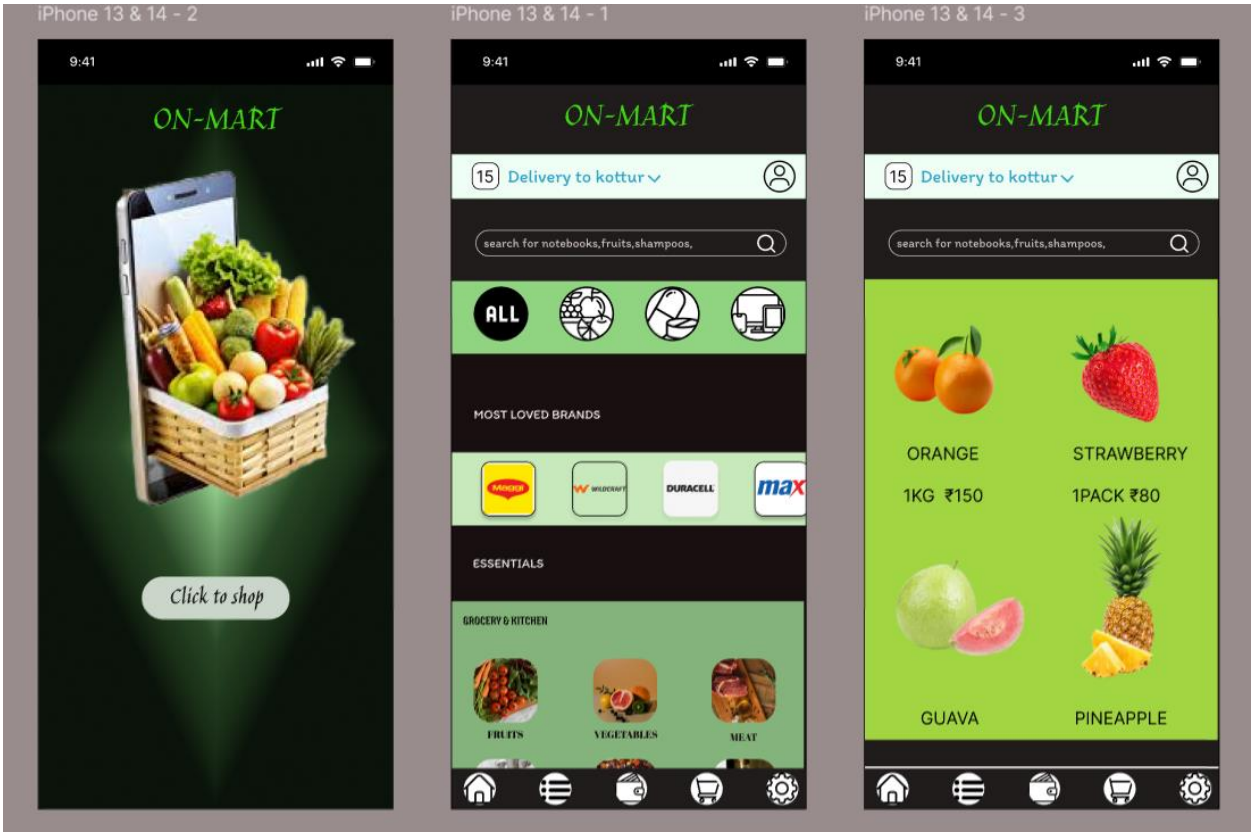
The initial design included items being placed so closely without good spacing.The colours used initially was darker and brighter which was so much contrasted ,not suitable and not appealing to users.

Onmart app had good navigation and with simple icons.

Issues Identified from User Feedback:

- Colors appeared too dark and slightly inconsistent
- Layout looked crowded with less spacing between elements
- Icons were not clear and difficult to understand
- Text readability was average due to compact design
- Overall interface felt less user-friendly

The sample design has been attached below



Prototype link :

https://www.figma.com/proto/9DnUFM2D7h6Mjc4h0mpoBw/Onmart?node-id=6-575&t=uvSSeWZARolk8bzu-1&scaling=scale-down&content-scaling=fixed&page-id=0%3A1&starting-point-node-id=6%3A575&show-proto-sidebar=1

DESIGN REFINATION:

Changes implemented

1.Colour improvements:

- Refined color palette with consistent shades of green
- Improved contrast for better visibility

2.Layout Improvements:

- Increased spacing between elements
- Proper alignment of components
- Reduced clutter in product sections

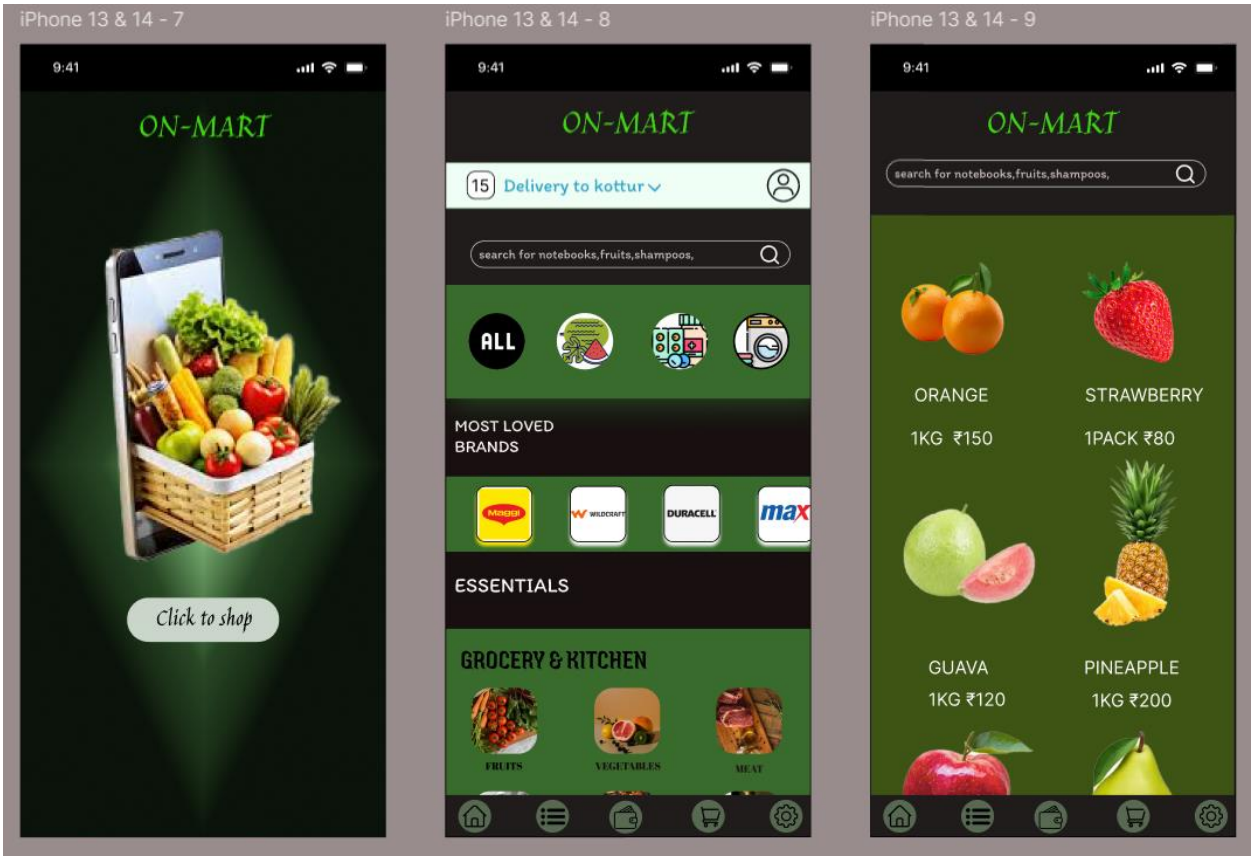
3.Typography improvements;

- Improved font size and readability
- Better separation of text elements

4.UI Enhancements:

- Cart screen redesigned with a clear visual (cart icon)
- Product display made cleaner and more organized
- Success screen improved with clear confirmation (tick icon)

The improved design has been attached below:



Prototype Link:

https://www.figma.com/proto/9DnUFM2D7h6Mjc4h0mpoBw/Onmart?node-id=52-137&t=AhJAzL2H5S01rPkM-1&scaling=scale-down&content-scaling=fixed&page-id=0%3A1&starting-point-node-id=52%3A137&show-proto-sidebar=1

Conclusion:

The design was successfully improved based on user feedback. The updated version is more structured, visually appealing, and user-friendly compared to the initial design. This experiment demonstrates the importance of feedback in refining UI/UX design.
